

Spring Planting Guide

Boise's average last frost date is May 10

Stagger your plantings to have a multi-week harvest. Cucurbits (cucumbers, melons and squash) and root crops do not like their roots disturbed. It is best to seed in plantable pot, or directly in the ground. Remember, dates are approximate, and can change with seasonal weather.

Vegetable	Feb 1 - Feb 14	Feb 15 - March 1	March 1 - March 15	20-Mar	30-Mar	10-Apr	20-Apr	30-Apr	10-May	20-May	30-May	10-Jun
Artichokes												
Asparagus	better to start from crowns, not seeds.											
Basil												
Beans, Fava												
Beans, pole/bush												
Beets
